

# Inside Heberlein. Professional Services.

As your trusted partner and solution provider, we offer far more than just products: practical advice, measurable results and profitable optimisation of your processes. Our experts deliver reliable insights and evidence-based facts to support informed decision-making.

## Textile Technology Centre.

Thanks to our advanced in-house ATY and DTY machines, we deliver fast and reliable testing results. Whether replicating a yarn or developing new products: we advise on textiles, procedural and economic issues, and end-use applications of filament yarns.

## Support world-wide.

Benefit from our global team of technical and textile specialists to conduct on-site trials for ATY, DTY or spinning applications.

Through close collaboration we select the best fitting solution to ensure your competitive edge.

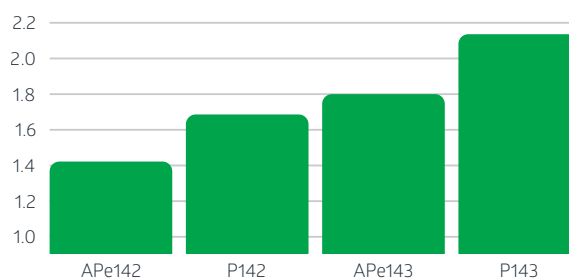

## Textile laboratory.

Tests carried out in our laboratory provide valuable data on the following parameters:

- No. of knots
- Stability of knots
- Tenacity and elongation
- Crimp and crimp stability
- Shrinkage in hot air and boiling water
- Evenness of the points above

## Better efficiency & lower costs.

Air consumption m<sup>3</sup>/h at 2 bar

Through targeted process optimisation, you can reduce air and energy consumption without compromising on quality.

## Why Heberlein?

- We are the leading experts for air interlacing
- A machine park unlike any other in the industry allows testing under production conditions
- From testing to insight: enabling informed decisions through comprehensive analysis.
